

Phoenix

SYSTEMS INTERNATIONAL, INC.

Capability Statement

Mission

To deliver high quality, competitive services that are best in value for our customer's strategic growth.

Core Competencies

- Site Preparation
- Demolition of building and structures
- Excavating, earthmoving, or land clearing

Differentiators

- **Experience:** Over 50 years of diverse industry experience PSI has advanced project and organizational management training. We accurately analyze and plan all phases of a contract with our management team of Project Managers, Master Builders and Master Masons. Our proven strategies allow us to execute all phases of construction to ensure organized and accurate processes to assist customers in maximizing their return on investment. Through design and execution of operations PSI helps customers deliver world-class value to their customers to become market leaders in their industry.

PSI has been involved in projects which encompass federal government housing projects, state welcome centers, state and local museums, educational centers and health care facilities. These projects offered challenges which were met with adhering to industry standards and safety requirements to ensure on-time delivery and completion of contractual obligations with superior customer satisfaction.

- **Diversity:** PSI has a diverse background and culture; team dynamics, entrepreneurial spirit and respect are key components in providing our customers the competitive edge necessary for mission success.
- **Management:** We provide successful management of multiple government and private contracts; upholding our values, ethical and moral standards of conduct in all activities, to ensure compliance of federal, state and private regulations.
